

Thank you and congratulations on your purchase of a 12" folding MICRO Sidewalker.

The Micro Sidewalker comes 70% pre-assembled. Below are the final assembly instructions. *They are intended for DIY customers.*

NOTE: If any part of the instructions is unclear, or if you are new to final bike assembly and are unable to get help from a friend, or if you prefer to let a professional do it, we recommend that you take the Micro Sidewalker to a local area bike shop for final assembly and safety inspection. (It is approximately 20 to 30 minutes work for a bike mechanic.)

You will need: 5/8" wrench, #5 Allen key, wire cutter.

PACKING LIST:

Open the box and ensure you have the following:

- 1) Frame with folding mechanism, front and rear brakes, attached foot platform, rear brake cable/cable housing.
- 2) Two identical 12" aluminum wheel sets.
- 3) Handlebar/stem with hand grips, brake levers and bell.
- 4) Small box or plastic bag with hardware inside.

Inside the small box or plastic bag:

- 1) Front brake cable/cable housing.
- 2) Reflector with nut and washer.
- 3) Two 90 degree "noodles": the rigid one for front brake, flexible one for rear brake.
- 4) Two cable ends.

THE FINAL ASSEMBLY:

- 1) Rotate the front fork 180 degrees so it faces forward.
- 2) Front wheel: Insert hub and position wheel into the front fork. Lock washers into the drilled holes in the frame and tighten the 5/8" nuts.
- 3) Repeat for rear wheel.
- 4) Handlebar/stem assembly: Slide the handlebar/stem into the head tube to desired height, and lock with locking arm.

5) Front and rear brake assembly: Use this link as a guide:

<http://pedalwithapurpose.wordpress.com/2010/11/02/brake-essentials/>

- 6) Rear brake: At the handle bar, slightly release the locking nut with #5 Allen key. Insert the long cable-end into the right handle bar brake lever, then adjust and tighten locking nut. Test rear brake lever for proper tension and correct action.
- 7) Front brake: Repeat above procedure for front brake. Test front brake lever for proper tension and correct action.
- 8) Cut access cable with wire cutter. Attach and press cable end.
- 9) Install reflector with nut and washer on front bracket.
- 10) Pump 55 psi into the wheels, and check the brakes.

Folding the Micro Sidewalker:

Bend down holding center of handlebar with your left hand.

With your right thumb push latch and forward, This will unlock the mechanism. Then fold the Micro.

To unfold, place the folded Micro on the ground. With your left arm unfold the Micro until the folding mechanism engages. Lock mechanism with the clamp.
